1. Objectives-

One of the significant responsibilities of college is Curriculum Design and Development. College considers student's needs and uses their feedback in the development of relevant programs to suit the student's professional and personal needs. College introduces a wide range of program options and courses with certain core values that are in tune with the emerging national and global trends and relevant to the local needs. Apart from the wide range of academic flexibility, aspects on career orientation, multi-skill development, feedback system and involvement of stakeholders in the curriculum are updated to meet the expectations of students.

The objective of this feedback analysis is to collect data for our curriculum, syllabus and course content so that we can improve and accelerate in the main area of our education system. We want to focus on

career-oriented syllabus design as well as on theoretical and practical aspects.
